## Python Programming for beginners

Language for Rapid Application Development

```
isted properties
<p style="font-weight:bold;">HTML font code is done using CSS.</p>
<body style="background-color:yellowgreen;color:white;">
<todoListid = data.todoIdb;

- persisted properties
<errorMessage = ko , observable() ;

color:orange;">HTML font code is done using CSS.</p>

function todoitem(data) { ;
  self = this ;
  data = dta || {} ;

<p>You can make <span style="font-style:italic">some</span> the HTML 'span' tag.
<p>You can bold <span style="">parts</span> of your text using the HTML tag.</p>

<name> <p style="font-weight:bold;"
HTML font code is done using CSS.</p>
<body style="background-
color:yellowgreen;
```

## Course Name: Python Programming for beginners

### Description:

Python is an interpreted, object oriented, high-level programming language with dynamic semantics. Widely used for Rapid Application Development, as well as for use as a scripting. Python's simple, easy to learn syntax emphasizes readability and therefore reduces the efforts of program maintenance..

Course Duration	12 Hours
No. Sessions	12 nos
Prerequisite	Basic Computer Skills
Age Group	8 Years onwards

### What you will learn:

- How to build mobile apps
- Important programming concepts and terminology

### Certificate : E Certificate

Requirements : PC with Windows/Mac/Linux O.S.

### Course Fees :

Batch Training : **Rs. 2790/-**

1 to 1 Training : **Rs. 6100/-**
